

GlassBench real-data inversion gap ledger

The allowed manuscript claim is the minimum over canary, timebase, ensemble, observable, semantics, and uncertainty gates.

target	stage	claim and blockers
KA2D T=0.23	real data canary timebase blocked	claim=short window coordinate trend only; ready=0; blocker=frame time point count next: derive or fetch trajectory frame time mapping;extract indexed npz members and compute unce
KA2D T=0.30	real data canary timebase blocked	claim=short window coordinate trend only; ready=0; blocker=frame time point count next: derive or fetch trajectory frame time mapping;extract indexed npz members and compute unce
