

GlassBench extended NPZ member index

Extended range probes index enough trajectory members for the ensemble threshold; multi-member extraction remains pending.

target	index stage	member-list evidence
KA T=none	trajectory layout incomplete	indexed members=0/4; threshold pass=0; split=none first four=none next=complete inner tar layout probe
KA2D T=0.23	member index threshold ready extraction pend	indexed members=9/4; threshold pass=1; split=test first four=N1290T0.23_202_tc05;N1290T0.23_228_tc05;N1290T0.23_299_tc05;N1290T0.23_299_tc10 next=extract indexed npz members and compute uncertainties
KA2D T=0.30	member index threshold ready extraction pend	indexed members=10/4; threshold pass=1; split=train first four=N1290T0.30_3_tc01;N1290T0.30_10_tc01;N1290T0.30_19_tc01;N1290T0.30_28_tc01 next=extract indexed npz members and compute uncertainties

This is member-list evidence only; physical lag times and uncertainty-weighted observable extraction are still required.
