

Frontier benchmark horizon

Recent SOTA sources are classified as reanalysis targets, closure horizons, model-extension gaps, or scope boundaries.

benchmark	class	cov	score	blocker	missing
glassbench trajectory horizon source: jung2025roadmap glassbench	trajectory reanalysis candid	1.00	0.90	uncertainty estimates	self intermediate scattering;ngp;diffu
gst nn potential transport horizon source: marcorini2025gst dynamic heterogeneity	transport heterogeneity cand	0.67	0.75	late ngp	late ngp;multi k tau alpha
near tg molecular motion rotational source: simon2026molecular motion	structural inversion candida	1.00	0.90	uncertainty estimates	none
experimental dynamic heterogeneity source: berthier2024experimental	closure horizon	0.60	0.27	external closure	diffusion;chi4 peak
heat capacity entropy frontier source: thermodynamic calorimetry candidate	scope boundary	1.00	0.45	renewal dynamics not the	none
