

# GlassBench real-cached microdynamic verdict

Cached KA2D coordinates quantify censored persistence evidence and a conditional PE bound while full PE inversion remains blocked.

verdict row

blocker=late recovery measureme

real pe inversion boundary

real pe inversion still blocked

evidence=1; inv=0; taup/taua=3.65; PE>=3.65

real pe inversion claim blocked  
blocker=physical time trajectory a

The verdict upgrades real cached trajectory evidence while preserving exchange-clock, physical-time-axis, and thermodynamic scope blockers.
