

# SOTA evidence verdict ledger

Claim alignment, signed constraints, and reanalysis state are collapsed into manuscript-safe evidence grades.

| source                   | phenomenon                                                                 | evidence grade               | allowed claim               | publish | reanalyze |
|--------------------------|----------------------------------------------------------------------------|------------------------------|-----------------------------|---------|-----------|
| kob1995vanhove           | cage plateau transient ngp van<br>stage: not required for literature claim | direct dynamical support     | dynamical signature support | 1       | 0         |
| kob1995intermediate      | self intermediate scattering a<br>stage: not required for literature claim | direct dynamical support     | dynamical signature support | 1       | 0         |
| hedges2007persistence    | persistence exchange decouplin<br>stage: not required for literature claim | direct dynamical support     | dynamical signature support | 1       | 0         |
| lacevic2003fourpoint     | chi4 peak and dynamic length g<br>stage: not required for literature claim | closure assisted support     | closure assisted dynamical  | 1       | 0         |
| berthier2024experimental | experimental dynamic heterogen<br>stage: not required for literature claim | closure assisted support     | closure assisted dynamical  | 1       | 0         |
| guan2014fickian          | fickian non gaussian diffusion<br>stage: not required for literature claim | direct dynamical support     | dynamical signature support | 1       | 0         |
| angell1995formation      | fragility growth<br>stage: not required for literature claim               | closure assisted support     | closure assisted dynamical  | 1       | 0         |
| kauzmann1948nature;adam1 | configurational entropy and id<br>stage: not required for literature claim | thermodynamic scope boundary | scope boundary only         | 1       | 0         |
| glassbench_zenodo_trajec | trajectory level persistence e<br>stage: awaiting full archive cache       | pending trajectory reanalysi | pending reanalysis only     | 0       | 1         |
