

SOTA GlassBench NPZ trajectory schema probe

First NPZ members are opened from streamed trajectory prefixes to verify coordinate-array schemas.

target	stage	schema	coords	shape	extract	blocker
KA T=none	trajectory inner tar layout incomple	0	0	0x0x0	0	trajectory payload
	member=none					
	bytes=0; md5=none; arrays=none					
KA2D T=0.23	trajectory npz coordinate schema ver	1	1	20x1290x2	0	full npz ensemble extraction p
	member=T0.23/test/N1290T0.23_202_tc05.npz
