

SOTA signed-constraint audit

Representative literature conclusions are encoded as required signatures and forbidden overclaims.

source	scope	constraint class	closure	publish	missing	forbidden made
kob1995vanhove	dynamical signature KA cooling shows cage plateau, transient NGP, broad van-Hove tails, and recovery	sota consistent	0	1	none	none
kob1995intermediate	dynamical signature KA self-intermediate scattering shows plateau, alpha slowing, and temperature-dependent shape	sota consistent	0	1	none	none
hedges2007persistence	transport decoupling persistence and exchange clocks decouple in atomistic glass formers	sota consistent	0	1	none	none
lacevic2003fourpoint	spatial heterogeneit four-point susceptibility and dynamic length grow on cooling	closure assisted consist	1	1	none	none
berthier2024experiment	spatial heterogeneit experimental dynamic heterogeneity grows close to the laboratory glass transition	closure assisted consist	1	1	none	none
guan2014fickian	dynamical signature colloidal particles can be Fickian while displacement distributions remain non-Gaussian	sota consistent	0	1	none	none
angell1995formation;ad	dynamical signature fragile liquids show growing apparent activation while Adam-Gibbs uses entropy input	closure assisted consist	1	1	none	none
kauzmann1948nature;ada	thermodynamic transi entropy extrapolation and heat-capacity anomalies require thermodynamic input	scope boundary consisten	1	1	none	none
