

SOTA benchmark consistency

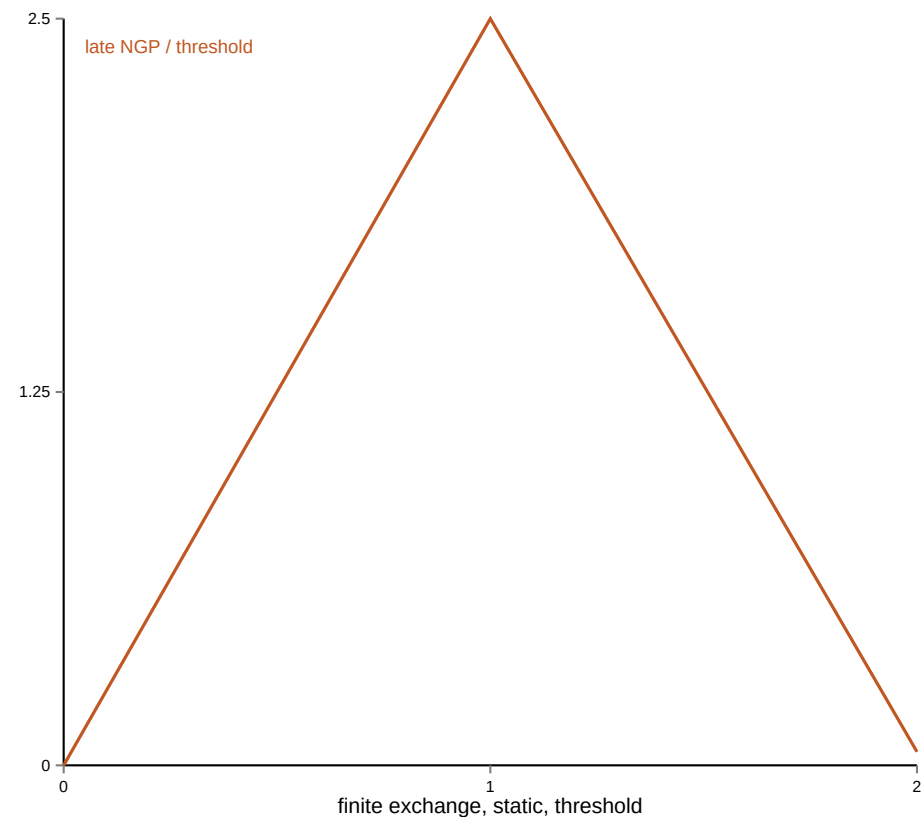

Literature-level conclusions encoded as explicit model consistency diagnostics.

AI. MCT beta visibility

MCT row consistent = 1
exponent row consistent = 1; $\lambda_a = 0.716$; $\lambda_b = 0.725$

AJ. Gaussian recovery mechanism

recovery row consistent = 1
SE row consistent = 1; D tau growth = 2.03; $\xi_{SE} = 0.581$
chi4 row consistent = 1; ξ_4 growth = 3.09; χ_4 growth = 34.7
front-law row consistent = 1; Df cv = $1.8e-16$; ξ_4 growth = 3.09
TTS row consistent = 1; residual = 0.611; C growth = 6.44
KWW row consistent = 1; beta hot/cold = 0.91/0.72; resid = 0.064
persistence/exchange row consistent = 1; $\tau_p/\tau_x = 9.0$; late residual = 0
van Hove row consistent = 1; peak tail = 2.90; late tail = 0.97
fragility row consistent = 1; m growth = 2.06; AG = $1.5e+08$
