

GlassBench direct-alpha multi-k shape gate

High-k cached F_s curves test multi-k KWW consistency while window-edge crossings block a full real alpha-shape claim.

target	multi-k stage	high-k alpha-shape evidence
KA2D T=0.23	cached multik alpha shape window edge blocked	structure=151; k=4.79844851031;5.4;6; crossed=3/3 beta spread=0.013; zmax=0.80; compatible k=3; edge crossings=1 blocker=post_alpha_window_depth; next=extend_cached_lag_window_beyond_alpha_cros

The candidate is intentionally not promoted until post-alpha window depth exists beyond the crossing lag.
