

SOTA evidence-class gate

Simulations, experiments, repositories, canaries, and thermodynamic claims are separated before quantitative inversion.

source	modality	evidence class	trend	invert	closure	blocker
kob1995vanhove;kob1995inte	simulation	structural simulation support missing inputs: particle trajectories;self intermediate scattering;ngp;uncertainty;shared ense	1	0	0	particle trajectories
weeks2002cage;guan2014fick	experiment	qualitative experimental trend missing inputs: particle trajectories;self intermediate scattering;ngp;uncertainty;shared ense	1	0	0	particle trajectories
berthier2024experimental	experiment	closure assisted experimental constrai missing inputs: particle trajectories;self intermediate scattering;ngp;uncertainty;shared ense	1	0	1	particle trajectories
glassbench_zenodo_trajecto	metadata reposito	metadata reanalysis candidate missing inputs: physical time;multi member uncertainty;self intermediate scattering;shared ens	1	0	1	physical time
synthetic_member_ensemble_	synthetic canary	uncertainty weighted quantitative test missing inputs: none	1	1	0	none
kauzmann1948nature;adam196	theory	thermodynamic scope boundary missing inputs: configurational entropy from dynamics;heat capacity;microscopic barriers	1	0	1	renewal dynamics not th
