

GlassBench late-recovery uncertainty verdict

Two-sigma late-recovery measurements gate finite-exchange support and static-disorder rejection without thermodynamic claims.

target	uncertainty verdict	two-sigma decision
KA2D T=0.23 s=151	late recovery observation not ready	candidate=KA2D:0.23:151:0; decision=0; finite=0; static=0 lag=0/4.3e+07; NGP upper=0; recovery lower=0 finite margin=0.05; static margin=0.1; blocker=late_recovery_observation
KA2D T=0.30 s=3	late recovery verdict protocol incomplete	candidate=KA2D:0.30:3:0; decision=0; finite=0; static=0 lag=0/0; NGP upper=0; recovery lower=0 finite margin=0.05; static margin=0.1; blocker=finit_e_exchange_envelope
KA2D T=0.30 s=none	late recovery verdict protocol incomplete	candidate=KA2D:0.30:none:0; decision=0; finite=0; static=0 lag=0/0; NGP upper=0; recovery lower=0 finite margin=0.05; static margin=0.1; blocker=finit_e_exchange_envelope
