

GlassBench KA2D time-code semantics

Official trajectory README maps tc file codes to lag times and identifies positions[20] as isoconfigurational replicas.

target	semantic stage	corrected fixed-time observables
KA2D T=0.23 tc05	physical timecode curve ready	t=0.1; tau_alpha=918306; members=9; time codes=8/8 MSD=0.003548; chi4(replica)=0.0416; axis0 replica=1; frame-axis time=0 blocker=none; next=run_persistence_exchange_inversion
KA2D T=0.23 tc10	physical timecode curve ready	t=1.1; tau_alpha=918306; members=8; time codes=8/8 MSD=0.019719; chi4(replica)=0.773; axis0 replica=1; frame-axis time=0 blocker=none; next=run_persistence_exchange_inversion
KA2D T=0.23 tc15	physical timecode curve ready	t=11.64; tau_alpha=918306; members=4; time codes=8/8 MSD=0.020802; chi4(replica)=1.92; axis0 replica=1; frame-axis time=0 blocker=none; next=run_persistence_exchange_inversion
KA2D T=0.23 tc20	physical timecode curve ready	t=122.47; tau_alpha=918306; members=5; time codes=8/8 MSD=0.022529; chi4(replica)=2.48; axis0 replica=1; frame-axis time=0 blocker=none; next=run_persistence_exchange_inversion
KA2D T=0.23 tc25	physical timecode curve ready	t=1288.41; tau_alpha=918306; members=6; time codes=8/8 MSD=0.025727; chi4(replica)=1.91; axis0 replica=1; frame-axis time=0 blocker=none; next=run_persistence_exchange_inversion
KA2D T=0.23 tc30	physical timecode curve ready	t=13554; tau_alpha=918306; members=6; time codes=8/8 MSD=0.040701; chi4(replica)=2.84; axis0 replica=1; frame-axis time=0 blocker=none; next=run_persistence_exchange_inversion
KA2D T=0.23 tc35	physical timecode curve ready	t=142587; tau_alpha=918306; members=5; time codes=8/8 MSD=0.14665; chi4(replica)=5.73; axis0 replica=1; frame-axis time=0 blocker=none; next=run_persistence_exchange_inversion
KA2D T=0.23 tc40	physical timecode curve ready	t=1.5e+06; tau_alpha=918306; members=6; time codes=8/8 MSD=1.2052; chi4(replica)=3.17; axis0 replica=1; frame-axis time=0 blocker=none; next=run_persistence_exchange_inversion
KA2D T=0.30 tc01	physical timecode semantics ready sparse co	t=0.11; tau_alpha=2200; members=49; time codes=1/6 MSD=0.0051728; chi4(replica)=0.0776; axis0 replica=1; frame-axis time=0 blocker=sparse_time_code_coverage; next=extract_members_across_all_official_time_codes

This corrects the trajectory-axis semantics; full time-code coverage is still required before real inversion.
