

Real benchmark assimilation gate

Published benchmarks must pass coverage, shared-system, machine-readable, and uncertainty gates before quantitative inversion.

benchmark	protocol	coverage	stage	struct	unc	blocker
kob andersen published figures	alpha vanhove transport source: kob1995vanhove;kob1995intermediate	1.00	qualitative alignment on	0	0	machine readable curves
kob andersen structural digitiza	alpha vanhove transport source: kob1995vanhove;kob1995intermediate	1.00	structural digitization	1	0	uncertainty columns
hedges persistence exchange publ	persistence exchange chi source: hedges2007persistence	0.71	qualitative alignment on	0	0	late ngp
lacevic four point shared transp	spatial chi4 front source: lacevic2003fourpoint	0.80	qualitative alignment on	0	0	diffusion
berthier ml experimental dynamic	spatial chi4 front source: berthier2024experimental	0.80	qualitative alignment on	0	0	shared system or temperatur
guan granick fickian non gaussia	alpha vanhove transport source: guan2014fickian	0.71	qualitative alignment on	0	0	wave numbers
kauzmann adam gibbs entropy boun	thermodynamic entropy cl source: kauzmann1948nature;adam1965temperature	1.00	scope boundary only	0	0	renewal dynamics not thermo
